PROJECTS

Streaming Website

Project for Personal Development

📅 August, 2023

- Built Responsive Website, modeled after Netflix, with ReactJs, Tailwindcss, and Firebase
- Connected application to MovieDatabase API to display popular and trending movies and tv with requests to the API
- Integrated Firestore database into application to allow users to sign up and add movies/tv to their personal list

Issue Tracker

Creator

📅 Oct 2022

- Designed a Issue Tracking System that allows Tickets to be created, assigned, updated and closed by teams or individuals.
- Created a Login page with user authentication and database password encryption
- Developed BackEnd with NodeJS, ExpressJS, and MongoDB
- Implemented functionality that allows users to request a password reset link that sends a link to their email using nodemailer

Library/Bookstore Database

Creator (Final Project for CSCI441 Software Engineering Course)

📅 September, 2022 - December, 2022

- Worked with team of students to create new features for project, design specifications, and documentation
- Implemented design using MVC architecture with NodeJS, Express, MongoDB, HTML, CSS, and EJS
- Created search functionality that allows users to search for books within the Store and add them to their personal collection.
- Designed and implemented protected Routes and Authorization control for Admin and Editor Roles

WORK EXPERIENCE

Finance Administrative Assistant

City of Elk Grove

📅 July, 2018 - January, 2022

📍 Elk Grove, CA

- Provided administrative support to the finance department at the City of Elk Grove
- Organized expense reports for the executive team and reconciled statements while ensuring on-time payment
- Collected and presented data to the Accounting Department and assisted in compiling of The Annual Comprehensive Financial Report (ACFR)
- Created forms and reports for prospective vendors to reduce the vendor vetting and on-boarding process
