SUMMARY

Data analytics professional with a bachelor's in computer science and a background in municipal finance operations. Skilled in Python, SQL, and data visualization, with hands-on project experience cleaning and analyzing large government datasets and communicating findings to non-technical audiences. Proven ability to identify data quality issues, apply regulatory context to analysis, and build reproducible workflows in Python and Tableau. Actively building a public portfolio and seeking junior data analyst roles.

SKILLS

Languages & Tools: Python, SQL, Tableau, Microsoft Excel

Core Competencies: Data Cleaning & Transformation, Exploratory Data Analysis, Data Validation, Dashboard Development

Domain Knowledge: Financial Reporting, Regulatory Data, Government Records, Municipal Finance Systems

Platforms: GitHub, VS Code, SharePoint, Microsoft Office Suite

EXPERIENCE

Finance Administrative Assistant

June 2018 - January 2022

City of Elk Grove, Finance Department

- Built and maintained Excel spreadsheets tracking expenditures, invoices, purchase orders, and accounts receivable across the department.
- Analyzed storm drain assessment costs across Zone 1 and Zone 2 mapped areas, auditing residential and commercial property charges; identified a commercial property misclassified as residential and billed significantly below its correct rate, and helped prepare a presentation to city council recommending reassessment of prior payments and future charges.
- Compiled financial reports for accountants by pulling SQL queries from the Finance Enterprise backend as part of a technical mentorship program.
- Assisted in building a SharePoint-based travel reimbursement workflow, replacing a manual spreadsheet process with employee preapproval submission, manager routing, and receipt upload, streamlining the process through to final payout.
- Collected, verified, and prepared datasets for financial and operational reporting, applying data validation and reconciliation across multiple record sources.
- Assisted in preparing the Annual Comprehensive Financial Report (ACFR) statistical section, coordinating data across departments.
- Supported 1099 reporting cleanup following a Finance Enterprise system upgrade by auditing vendor records and correcting discrepancies.

PROJECTS

Pesticide Residue Risk Analysis | USDA Pesticide Data Program

2026

Python, Pandas, Tableau Public | Personal Portfolio Project

- Sourced, cleaned, and transformed over 600,000 rows of USDA pesticide residue testing data using Python and pandas, resolving inconsistencies in commodity codes, detection flags, and chemical identifiers.
- Built and published an interactive Tableau Public dashboard analyzing detection rates and tolerance exceedances, and identified specific pesticides permitted in US produce at levels restricted or banned in the EU.
- Documented findings in a structured written analysis with policy implications, and produced a presentation-ready summary of methodology and recommendations.

ADDITIONAL EXPERIENCE

AI Data Contributor

2024 - Present

Prolific | Data Annotation Tech (Independent Contract)

- Completed structured AI training and dataset evaluation tasks, including data labeling, categorization, and quality review across single-turn and multi-turn conversational responses.

- Assessed factual accuracy using strict pass/fail criteria, where any inaccurate portion of a response resulted in the full response being rated inaccurate.
- Evaluated multi-turn responses for accuracy and quality, applying platform-specific guidelines with close attention to detail and consistency across independent assignments.

Short-Term Rental Owner/Operator

August 2022 - October 2025

- Renovated and managed a short-term rental property, tracking renovation costs and purchase receipts in Excel for cost analysis, revenue assessment, and tax reporting.
- Analyzed pricing, occupancy, and booking performance using Airbnb host dashboard analytics, adjusting nightly rates based on seasonal demand and market comparisons to optimize revenue.
- Monitored monthly revenue and profitability against renovation and operating costs to assess overall return on investment.

EDUCATION

Bachelor of Science, Computer Science

December 2022

Fort Hays State University
